

Columbia Drag Boat Association

Technical Inspection Process

Can Am Challenge 2011

The following information is for technical inspections of the boats for our
June 24,25,26 race:

Make sure that you have a Lucas 2011 Rule Book. If you do not, it is available on line at the Lucas Drag Boat Racing Series website or the CDBA website and can be downloaded and printed. If you did not receive one with your membership, please let your club secretary know.

1. You will be given a technical inspection sheet at registration. (There are tech sheets available on the CDBA website to review to make sure that your boat will pass inspection. There is also a “driver’s worksheet” that will give you the page # and article # for each item on the inspection sheet.)
2. Each driver will be asked to inspect his/her boat with the technical inspection sheet provided. All boats that are 10 seconds and slower will report to a technical inspector. All other boats will report to the tech lanes near the boat ramp. There will be random inspections. **DO NOT SIGN THE TECHNICAL INSPECTION SHEET.** Your signature must be witnessed by the technical inspector. Once your sheet/boat have been approved, you will be issued a sticker for the weekend and are cleared to race.
3. **Thursday, 6/23/11.** Technical inspections will begin approximately at 12:00 field only and approximately 2:00 PM in the lanes.
4. **Friday, 6/24/11.** Technical inspections will begin at 8:00 AM.

*****Please see the schedule of events that will be posted prior to the race for any changes in the inspection times.***
